## BALES DECREASE, MONEY INCREASES

South's Cotton Crop This Year Worth \$61,000,000 More Than Last Year's.

### TEXAS GROWS BUMPER CROP

Fall Off in Other States Brings Output Down Nearly 2,000,000 Bales.

New Orleans, September 4.-Secretary Hester's annual report of the cotton crop issued to-day, says the crop of 1912-13 is 14,167,115 bales, a decrease under that of 1911-12 of 1,971,311 bales, and an increase over that of 1910-11 of 2,047,020 bales. He says that the crop of Texas, which is 535,000 bales over last year, is the largest ever grown in that State, but that the Texas increase has been more than offset by a falling off in other sections, the years of class of the country of the countr the group of "other Guif States" embracing Louisiana, Mississippi, Arkansas, Tennessee, Oklahoma, Missouri, Arizona, California, Kansas and New Mexico having fallen of 496,690 bales, and the group of Atlantic States, including Alabama, North Carolina, South Carolina, Georgia, Florida, Westbale Carolina, Georgia, Florida, Kentucky and Virginia, showing a decrease of 2,010,000 bales.

The weight of the crop, Mr. Hester gays, was 4 27-100 pounds per bale heavier, the increased weight being equivalent to an additional 118,600 bales of last year's growth, and practice.

Face of Prediction of Falltically every vestige of the crop has been used and the mills have had to trouch on the visible and invisible supply left over from last season to the extent of 726,000 bales.

seed, is placed at \$998,425,059, against \$937,280,764, and attention is called to the fact that for a crop embracing 1. 971.311 bales less cotton and 892,000 Approximately the actual growth was

14,923,000 bales, or 74,000 bales less than the commercial crop.

mum consumption until the last half of the year. This year, while the aggregates have varied, there has been no let up from month to menth, and early indications of record consumption were sustained as the season progressed.

Increase in spindles.

The report puts the spindles in the south at 12,519,323, including old, idle and not completed. American Agricultural Chemical dropped 21-2 on reports of unfavorable trade conditions.

Demand for Copper.

In bright contrast came the rumors from London that grave apprehension was felt concerning the supplies of copper metal, with plans under discussion to prevent any undue inflations in prices.

It is reported that a stream breasts, allaye at the season progression of the process of the report of the reports of unfavorable trade conditions.

ing Conditions.

BY BROADAN WALL.

Grade Is Better.

In grade the crop has been better, averaging middling to strict middling, compared with an average for last year of strict low middling to middling.

Mr. Hester puts the average price per pound for middling for the year at 12.20 cents, compared with 10.16 last year; 14.61 year before, and 14.37 in 1909-10, and the average commercial, value per bale at \$63.59 against \$51.45 last year, and \$75.69 the year before.

The value of the crop, including the the cotton section and the price of the cotton section at the p

Total crop bales 14,167,000, against 16,138,000 bales last year.

Mills Are Active.

Mr. Hester says that American mills have had another year of remarkable activity, both North and South, the number of bales used having been greater than ever before, and aside from mention in some instances of negessity for more labor there has been a singular absence of compilaints of sany kind. In the South, which has been most active, mill replies as a rule have contained the stereotyped statement of 'full time."

An increase of 543,000 spindles is shown in Southern mills in operation and seven mills in course of construction, with liberal additions of spindles to old concerns embrace a total of exceeding 300,000 additional spindles, most of which may come into play in the near future.

Mr. Hester says last year the mills Markers that both the Bank of France would probable which were discount, and the serve of discount, and it is expected it will have a fay-orable effect on the money market here. As an indication of the better conditions abroad, an over-subscription in London is reported for the \$12,500,000 and over-subscription in London is reported for the \$12,500,000 and the stereotyped statement of 'full time.'

An increase of \$13,000 spindles is shown in Southern mills in operation and seven mills in course of construction, with liberal additions of spindles to old concerns embrace a total of exceeding 300,000 additional spindles, most of which may come into play in the near future.

Mr. Hester says last year the mills have deed the floor trader to work for lower prices. The market, however, grew extremely dull. Steel common found support around \$2.5 couthern Pacific and Steel; a drop of a point in Reading and Union Pacific and Steel; a drop of a point in Reading and Union Pacific and Steel; a drop of a point in Reading and Union Pacific and Steel; a drop of a point in Reading and Union Pacific and Steel; a drop of a point in Reading and Union Pacific and Steel; a first who pleased the crowd with several selections. Health Inspectors Given Impromptu
Bath When Cellar Steps Give Way.

Thomas M. Landers, chief plumbing inspector; T. W. Mitchell, sanitary inspector of the Southside, and S. P. Watkins, a barber, had a narrow escape from drowning yesterday morning when the steps of a cellar in the house at 1613 Hull Street gave way, throwing them into the water which filled the lower basement.

There they remained for some time, shivering, until a ladder could be brought and their rescue effected. Chief Landers lost his derby in his almless floundering around the dark pool.

The health authorities went to the house, which is occupied by the barber shop of Watkins & Myers, for the purpose of inspecting the defective way.

# **ARMY AVIATOR IS** KILLED BY FALL

First Lieutenant Love, of Signal Corps, Native of Fairfax, Victim.

San Diego, Cal., September 4.—First Lieutenant Moss L. Love, signal corps, U. S. A., was instantly killed to-day when his aeroplane plunged 300 feet to the ground at the army aviation school near here. Shortly before the accident he began to descend from an altitude of approximately 2,000 feet. When 300 feet from the ground watchers say they saw a puff of smoke on the machine, and it dropped like a shot. Love was the son of Judge James M. Love, of Fairfax, Va. He was about thirty-three years old, and unmarried. The exact cause of the accident was not ascertained. Witnesses say the air was absolutely still at the time, in of famous good houseso far as they could tell, and the machine was gliding to the ground. The
aeroplane was wrecked.

The lieutenant was assigned to duty
with the first aero squadron last April.
